MICROGUARD ECOSPHERE 140g/m²
100% Polyester (Recycled)

Stash the packable padded vest in your pack and you've got the instant antidote to falling temperatures. This lightweight, windproof quilted gilet is a brilliant piece of kit. The gilet is filled with our very warm, recycled MICROGUARD synthetic fibre insulation. The windproof outer fabric boosts the thermal performance. This fabric is also recycled. The JWP VEST works really well as a layering piece under a jacket or over a T-shirt. In wet weather you can team it with your hardshell.
