100% Polyester

It can be chilly first thing in the morning up in the hills. But if early starts and big days out are your thing, the Hooded softshell jacket is the go-to jacket for guys like you. It is simple, uncomplicated and practical - suitable for demanding mountain hikes or leisurely walks in the woods. When designing this softshell jacket, we focused on the essentials: windproofing and breathability. The STORMLOCK fabric is hard wearing, and light showers simply bead up and run off the surface. And the fabric is so stretchy that the jacket always fits comfortably, whatever you're doing in it. This is a simple, no-frills softshell jacket that gets the job done.
