JW014 Quarter-zip fleece

Details

Weight:
200g (Size L)

Main Fabric:
POLARTEC ® 100 SERIES
100% Polyester (Recycled)

The quarter zip fleece is warm, packable and weighs next to nothing. And because the fleece is produced from recycled PET bottles, it's good for the environment too. You can wear this robust fleece pullover as a mid layer in a technical layering system or slip it on over your base layer for a little extra warmth during rest breaks on the trail. When it comes to versatility, the quarter zip fleece is pretty hard to beat.
